

# Auto Services Co. Maximizes OpenStack Benefits with Software-defined ADCs

## Self-Service and Automation Accelerates OpenStack App Development

### PROBLEM

- Inability to leverage existing infrastructure (that are outside OpenStack) within OpenStack environment
- Ability to leverage AWS for application delivery

### WHY AVI

- Self-service and complete automation to accelerate application delivery in OpenStack
- Single ADC solution to deploy applications residing within and outside OpenStack

### RESULTS

- Able to deliver application services beyond load balancing such as visibility, self-service, and analytics
- Accelerates OpenStack deployment with central control
- Reduced administration time for load balancing
